## **PREMIUM QUALITY** **AFFORDABLE FUN**

SMART-TEMP heat pumps are available only through a select group of pre-qualified pool dealers in America who have demonstrated a commitment to quality products, technical expertise and excellent service after the sale.

Only Smart-Temp heat pumps combine low temp heating capacity (starting as low as 40 degrees) with an exclusive override water temp feature so your pool stays at the temperature you've set. Always warm, always ready, at a fraction of the cost of gas heaters.

Strongest warranty in the business comes from the strongest team in the business so you're protected against life's uncertainties with SMART-TEMP.

# SMART-TEMP HEAT PUMPS

By AquaComfort

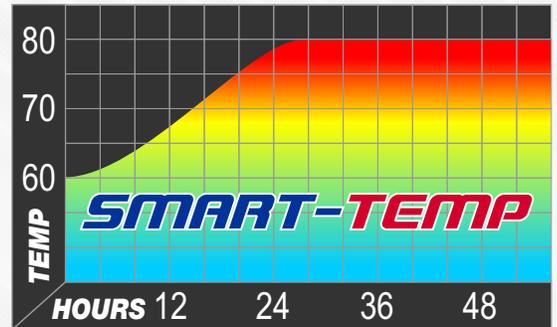

## Cost Of Use:

Gas heaters use an outdated design that spikes the water temperature every few hours because it's simply too expensive to run consistently. The result is an uneven temperature range and HUGE costs of hundreds of dollars every month to use.

## The Heat Pump Advantage

Smart-Temp heats water evenly at any flow rate and water temp is maintained inexpensively using nature's own ambient heat. Smart Temp provides \$6 in heat for every \$1 of electricity used. The result is a pool that is always warm and always ready... and is 75% less expensive to use than gas.

## The Smart-Temp Advantage

Although you'll love the high tech look of Smart-Temp, that modern look is also reflected inside the cabinet. Only Smart-Temp has our low temp capacity (working efficiently down to 40 degrees) with an exclusive override feature that keeps the water at your desired setting built into every heater.

## And If All That Isn't Enough...

Using a gas pool heater, you'll release of over 10,000 pounds of CO2 into the atmosphere every year. When you use Smart-Temp technology, you are reducing those onsite CO2 emissions by 100%! Investing in a Smart-Temp heat pump just makes sense on every level!
